IMPORTANT INFORMATION TO KNOW BEFORE INSTALLATION

The ignition interlock is a small alcohol breath analyzer that resembles a CB Radio. It is not difficult to use, but does require the driver to blow air into the unit each time before the vehicle is started and randomly thereafter. The ignition interlock.....

- Requires \$198.00 at time of installation. This cost includes \$70 for install, \$120 for 1st two months advance lease fee, and 8.40 sales tax.
- Cost \$60.00 per month to lease (plus \$4.20 tax).
- Cost \$70.00 to change vehicles.
- May incur a surcharge of \$20.00 for failure to show for a scheduled install appointment.
- Requires one to two hours to install & the user to be present during the installation.
- Sometimes requires a refundable deposit if installed prior to conviction.
- Is for all cars and trucks but not for motorcycles & can be used by other drivers in the family.
- Is monitored every two months for violations and calibration; at which the next two months advance lease fee & tax is required (\$128.00).
- Is alcohol specific with no "false" positives.
- Requires early return for sensors and possible loss of driving privilege if monitor violations occur.

A program by the State of North Carolina requiring breath analyzer ignition interlock devices on vehicles driven by DWI offenders
